****RLYB Scalp Setup Brief**** RLYB is exploding +43.8% on news that Candid terminated their merger agreement, creating a massive gap-up with 4.37x relative volume on a tight 3M float. ****Risk:**** This is pure momentum/news trading with high volatility - price could reverse quickly if buying pressure exhausts. ****Entry context:**** Look for pullback entries on volume spikes near psychological levels (\$13, \$14) or breakouts above morning highs with confirmation. ****Watch:**** Volume sustainability - if RVOL drops below 2x or we see large red candles on high volume, momentum is likely fading fast.

Price Range		3/5	■■■■■■■■■■		

****GCTS Scalp Setup Brief**** GCTS is running on 7.22x relative volume following a business update announcement, with the stock gapping up 6.3% and trading at \$1.75 (+10.1%). Key risk is the large 56M float which could create supply pressure on any momentum fade. Ideal entry is on a pullback to the \$1.68-1.70 gap fill area with volume confirmation, targeting a bounce back toward \$1.80+ resistance. Watch for volume spikes above 2M shares per 5-minute candle as your signal for momentum continuation or exhaustion.

Price Range	3/5	

***CELU Scalp Setup - GO** CELU is running on Nasdaq compliance news from 2+ days ago with exceptional 6.88x relative volume sustaining the +9.7% gap up, indicating strong institutional interest in the \$1+ biotech bounce play. Key risk is the small 14M float creating volatile swings that can quickly reverse gains, especially if volume starts declining from current levels. Look for entries on pullbacks to VWAP or the \$1.00 psychological level with tight stops, as this price range offers good risk/reward for momentum continuation. Watch the \$1.10 resistance level - a clean break with volume could trigger another leg up toward \$1.20.*
