****ABTS Scalp Setup Brief**** ABTS is running on massive 17.64x relative volume with a 52% gap up, likely driven by being highlighted as a top pre-market gainer creating momentum buying pressure. The 2M float provides excellent volatility for scalping, but the risk is high given the extended +27% move and potential for violent pullbacks. Look for entries on any consolidation above \$1.35 support with tight stops, targeting quick 5-10% moves on volume spikes. Watch for volume to sustain above 500K on 1-minute candles - if it drops significantly, momentum could evaporate quickly.
