****USEG Scalp Setup - STRONG GO**** USEG is exploding +47% premarket on 8.55x relative volume, likely momentum-driven from appearing on "top movers" lists with no fundamental catalyst - classic momo play. ****Risk:**** No real news means this could fade fast once volume dies down. ****Entry context:**** Look for pullbacks to VWAP or key support levels around \$1.10-\$1.15 for long scalps, or short into any parabolic moves above \$1.40 resistance. ****Watch:**** Volume sustainability - if RVOL drops below 3x, momentum is dying and reversal risk increases significantly.

Catalyst (1.5h ago · ChartMill · Low Impact)

As the US market prepares to open on Monday, let's get an early glimpse into the pre-market session and identify the stocks leading the pack in terms of gains and losses.

Price Action		10/10			
Float		6/8			
Price Range		4/5			

****RMAX Scalp Setup Brief**** RMAX is ripping 26% on acquisition news by a tech-focused real estate brokerage, with massive 5.15x relative volume confirming institutional interest in the deal arbitrage play. The key risk is gap-fill pressure back toward \$8.40, especially if broader market turns or deal skepticism emerges. Look for entries on any pullback to VWAP (\$9.60s) or on momentum continuation above \$10.20 with volume confirmation. Watch the \$10.50 resistance level - a clean break with volume could trigger another leg up toward \$11+.
